

# ANIMAL

## *Basic Shapes*

### GOAL

Learn how to identify basic shapes when drawing an animal.

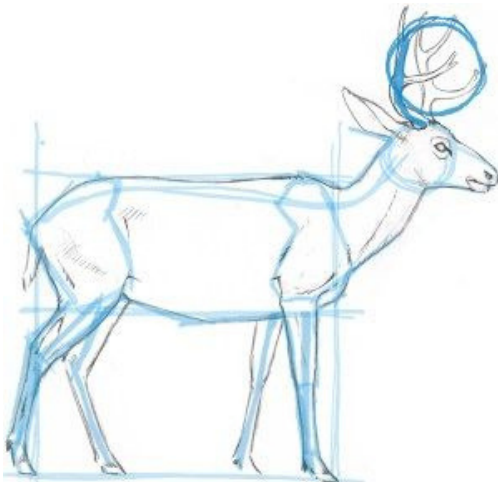

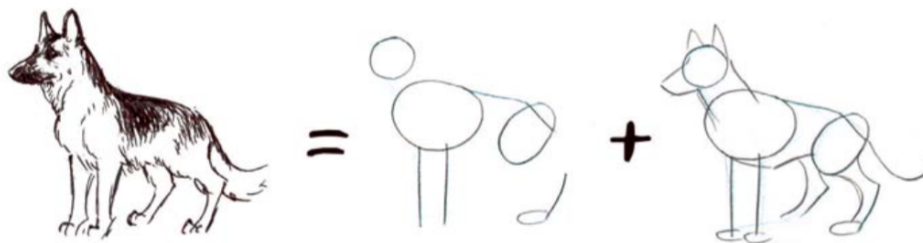

### TECHNIQUE

Basic Shapes  
Box-in Shapes

### INSTRUCTION

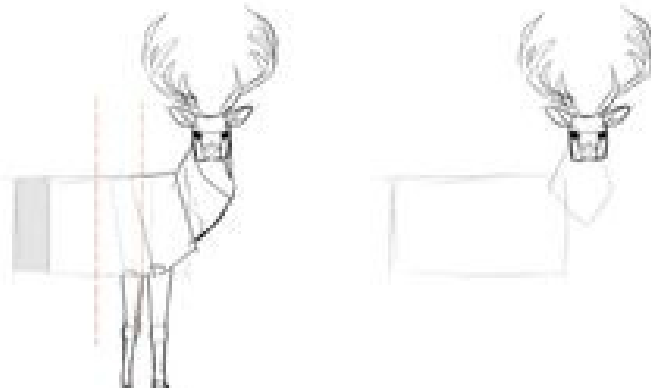

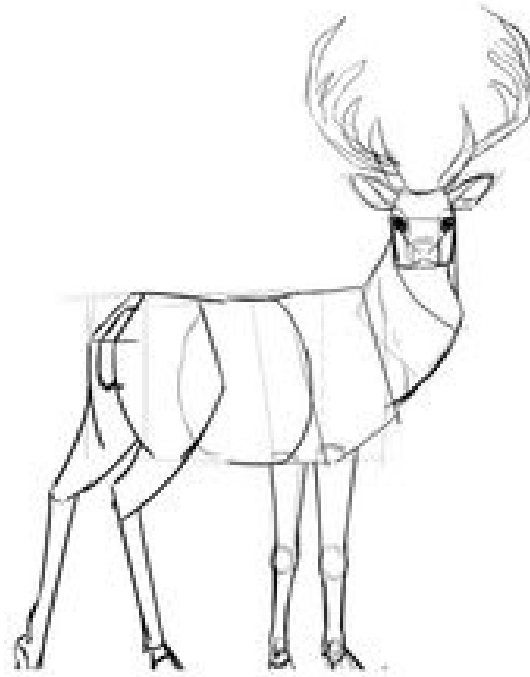

Drawing an animal begins with identifying the basic shapes of the animal's body. Remember that a basic shape can include a circle, square, oval, or rectangle and can include a variety of angles.

In the example below, the head of the dog is a circle while the body is comprised of two ovals. What other basic shapes are used to form the dog's legs and other features?

Box-in shapes can also be used to help determine proportions of the animal's limbs. In this image of a deer, a large square boxes in the deer's body and legs. The square is then divided into two rectangles to show the placement of the body and legs.

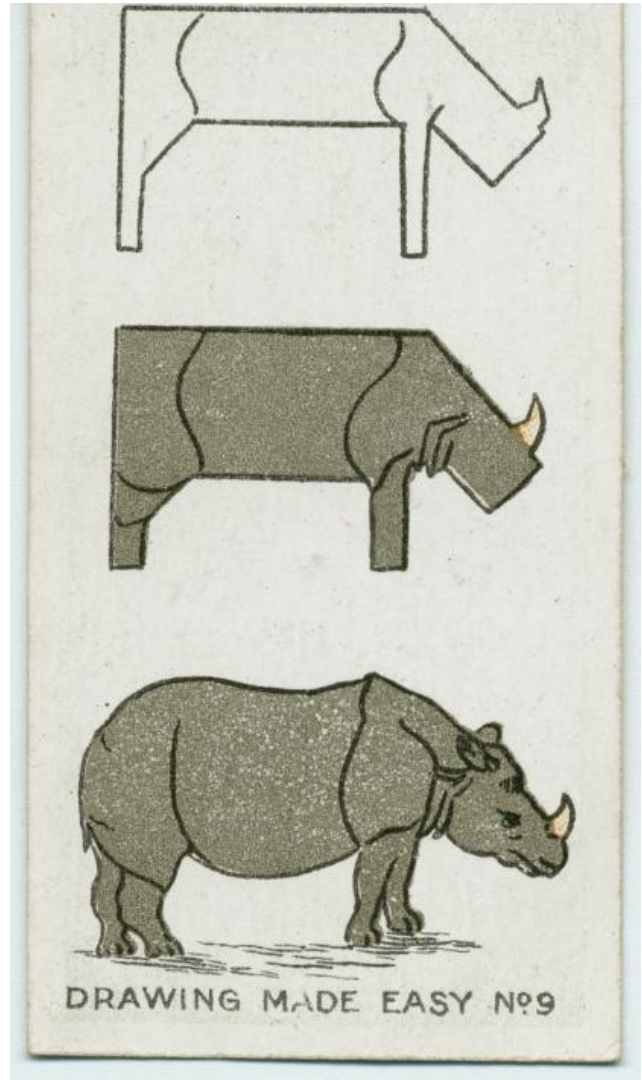

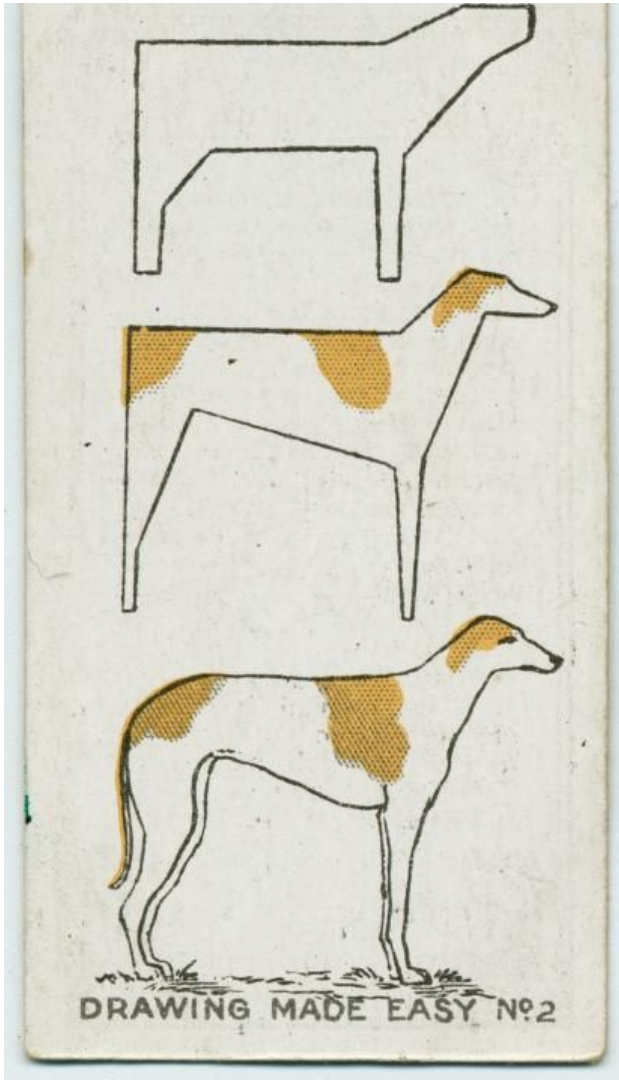

## EXAMPLE

Example of basic shapes and box-in shapes used to draw an animal .

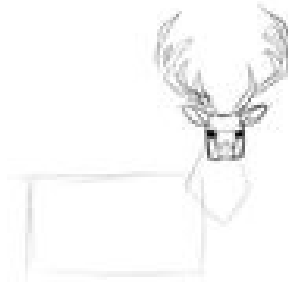

## PRACTICE

Practice using basic shapes and block-in shapes to draw the animal.

## PRACTICE

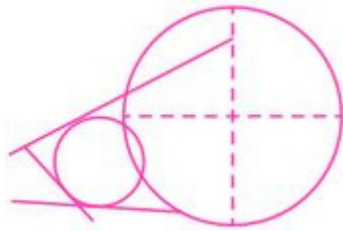

Practice using basic shapes and block-in shapes to draw the animal.

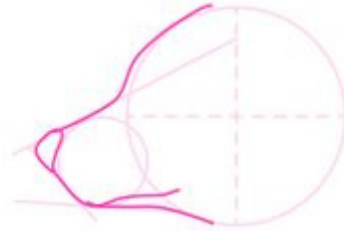

## PRACTICE

Practice using basic shapes and block-in shapes to draw the animal.

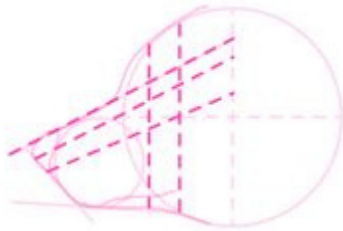

1.

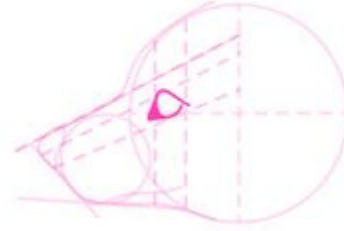

2.

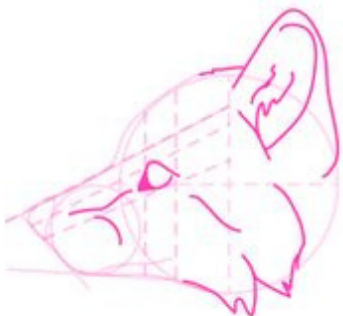

3.

4.

5.

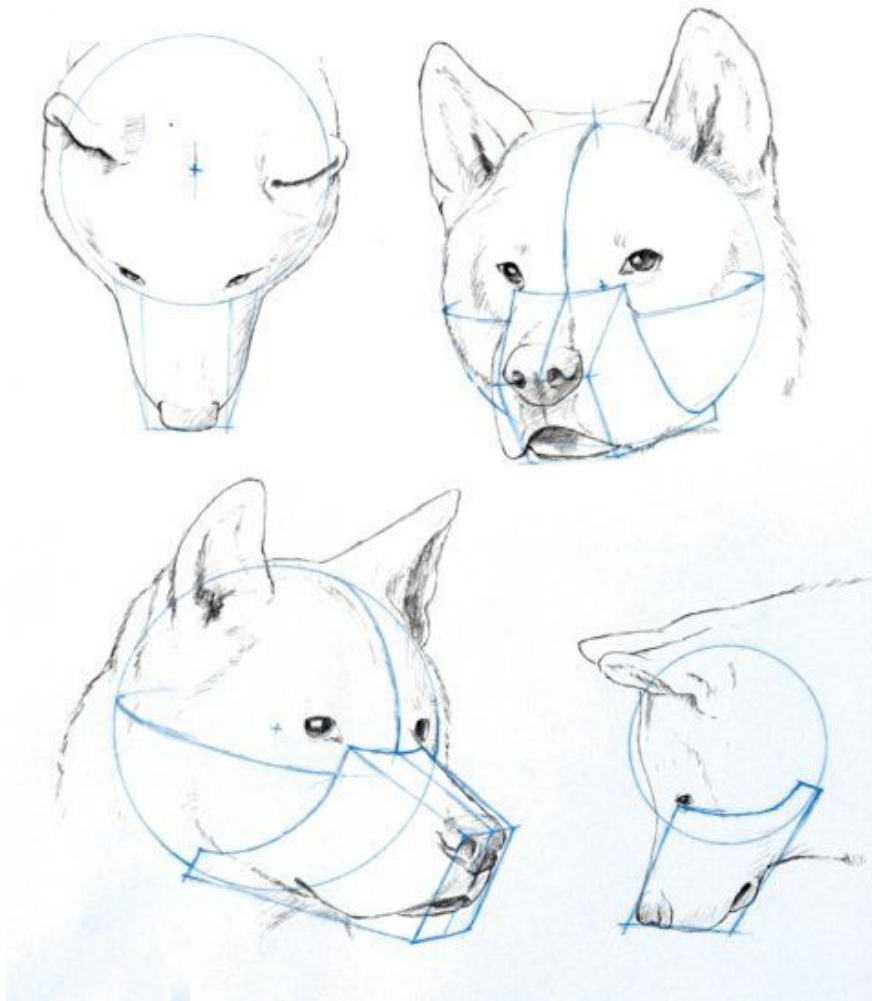

6.

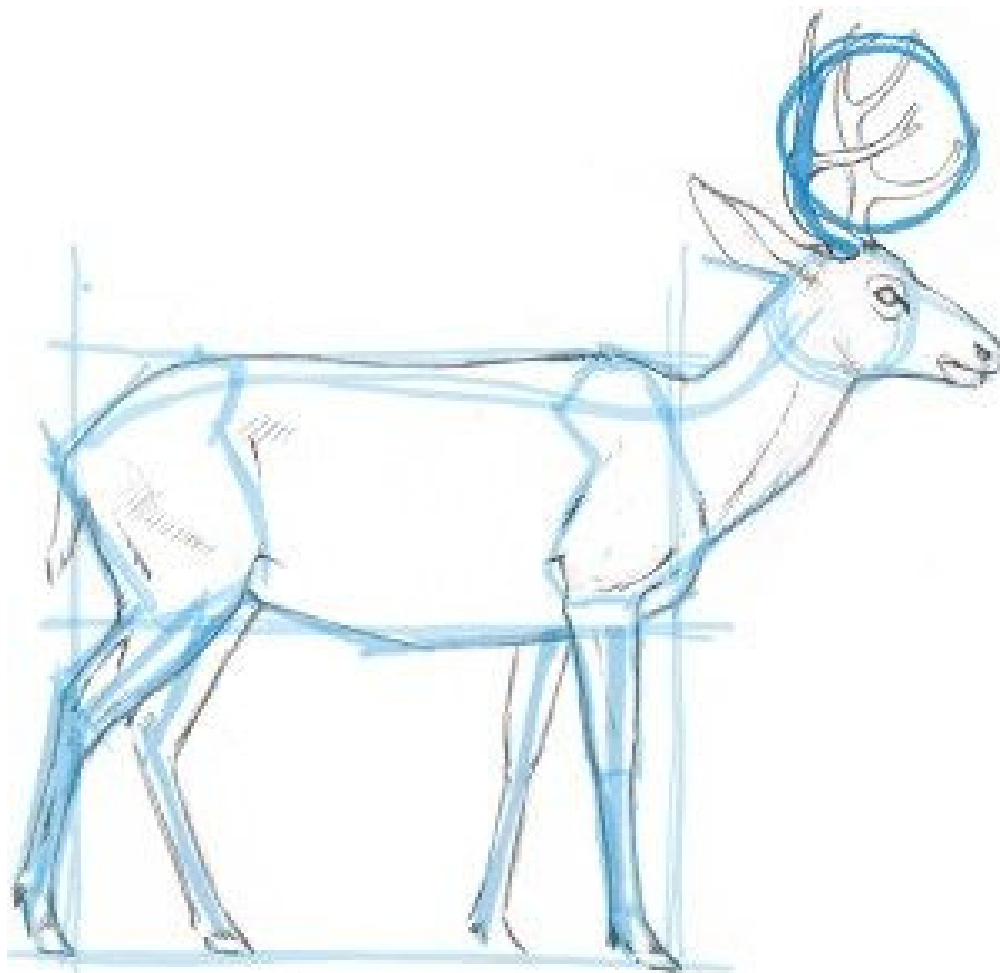

## PRACTICE

Practice using basic shapes and block-in shapes to draw the animal.

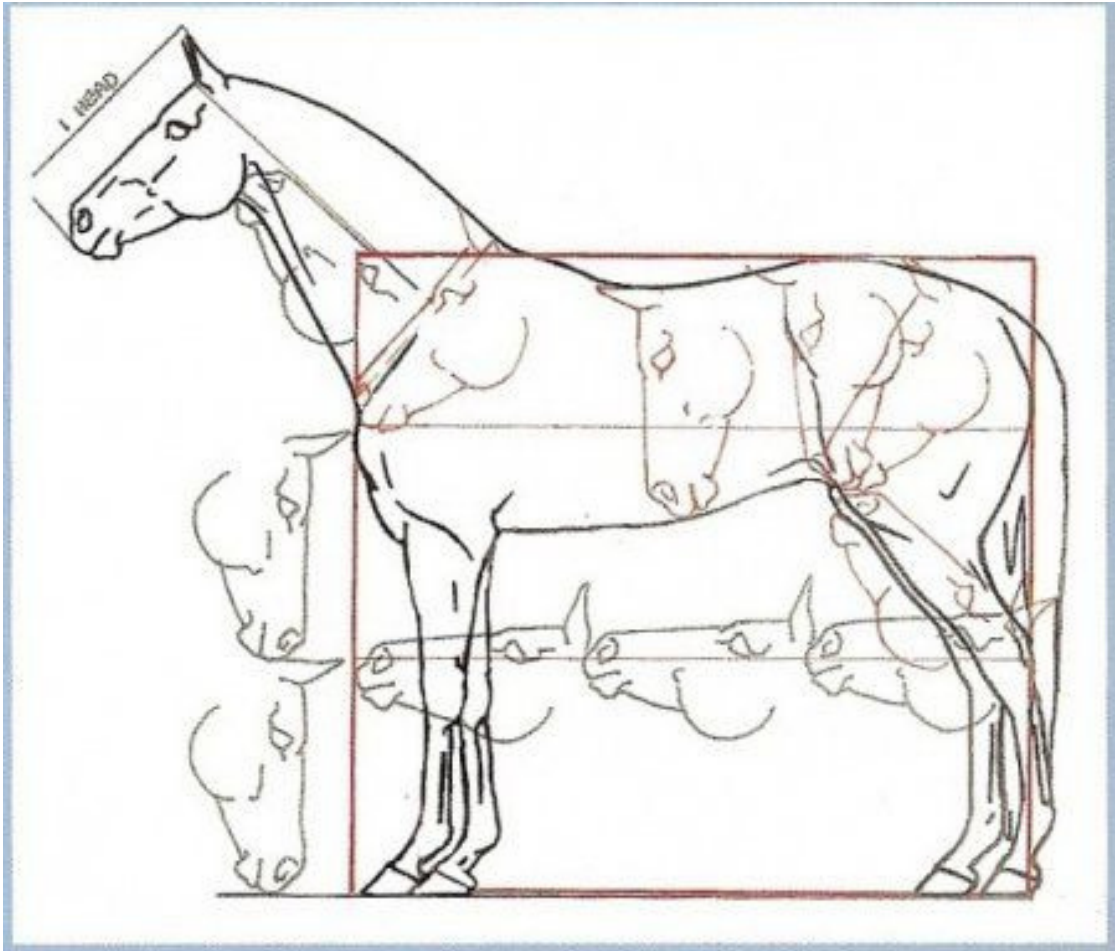

## PRACTICE

Practice using basic shapes and block-in shapes to draw the animal.

## PRACTICE

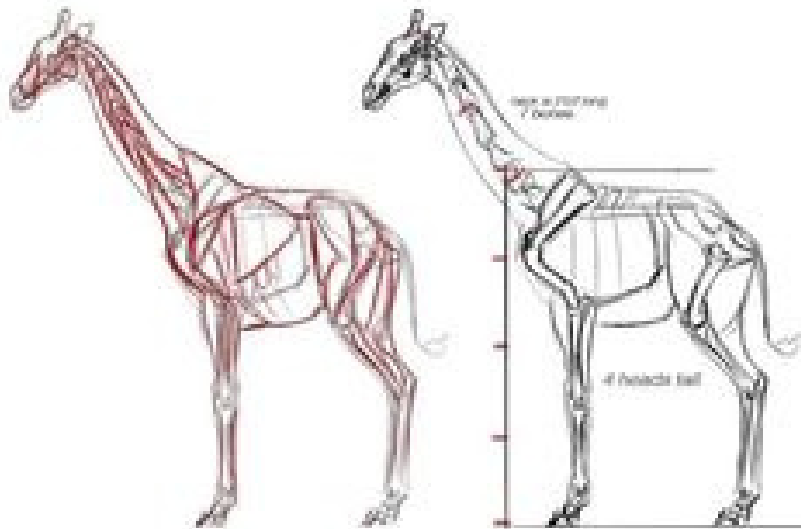

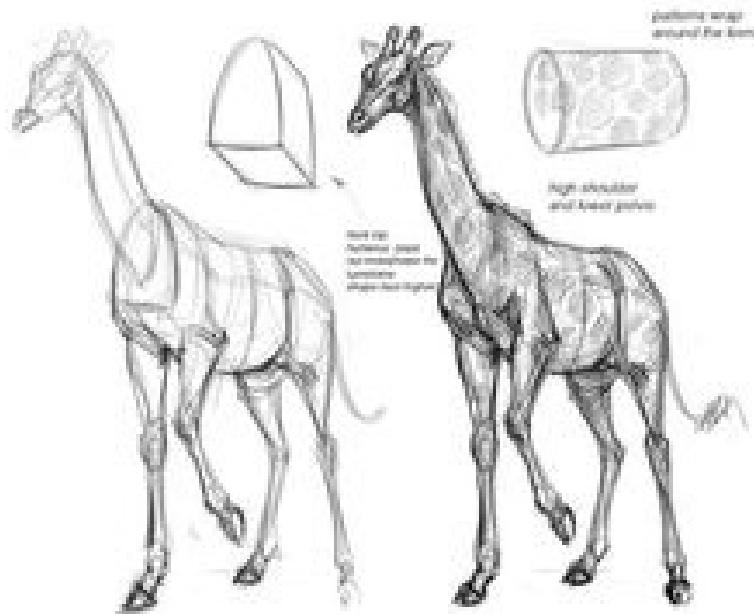

Practice using basic shapes and block-in shapes to draw the animal.

# PRACTICE

Practice using basic shapes and block-in shapes to draw the animal.

## PRACTICE

Practice using basic shapes and block-in shapes to draw the animal.
